Gas Powered Jetting System with Honda 9HP Engine, 3GPM, 2700PSI, 3/8x200ft Hose, Reel, Nozzle, Cart	125lbs	2,856.00
Masport HXL3V Pumping System, 9HP Honda Engine Installed on trailer for heavy duty pumping and discharge	180lbs	3,685.00
Shipping Skid for Trailer	150lbs	250.00

The Dyna-Lite rolls on and off this trailer easily with the fold down loading ramp and winch. The steel tank unit can be used for pressure discharge or as a larger vacuum compartment using the Dyna-Lite for the Vacuum Power. Poly tank units are for transport with gravity draining of the tank contents.

The addition of the auxiliary vacuum pump system makes this unit a powerful vacuum pumping machine for large pumping jobs or to remove material from the Dyna-Lite. Also works great for pressure discharge of the holding tank
